

EQUIPMENT

Diagnostic equipment and stethoscope will be provided by the PCM-1 course. Further information will be given during orientation week.

NOTE: You will be using your equipment with your Clinical Skills Preceptors, mentors, in your standardized patient experiences, your small groups, your volunteer experiences, in the summer immersion trips and for the rest of your life as a practicing physician.

-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------

Note: Items that are non-standard will require you to pay the additional amounts listed above at the time of delivery.

*To opt-out, you must demonstrate to the course director that you have reasonable, comparable equipment already. You'll be asked to present this equipment in the next few weeks to Dr. Michelfelder. You will have at least 18 exercises over the first two years where you will be expected to use your own equipment in practice and testing sessions, so we want to make sure your equipment is in good shape.
