

Topics in Clinical Medicine 3 Exam

The Topics in Clinical Medicine 3 exam will be held on **Wednesday June 14, 2017**.

The exam will include multiple-choice questions from the five Vertically Integrated Curricula (VIC):

End of Life
Nutrition
Prevention and Screening
Quality and Patient Safety
Radiology

The Radiology exam will be via the traditional “closed book” format

The End of Life, Nutrition, Prevention/Screening and Quality/Patient Safety exams will be “open book”. Students will be able to use written resources brought to the exam and LUMEN resources accessed via the computers in the SDLs. Personal electronic devices and computers will not be allowed in the exam. **The “open book” format should not preclude each student’s preparation for these exams.**

Students will be provided Objectives for each VIC exam to guide their studies.

Each of the VIC exam components will be graded separately.

Students must PASS each individual VIC exam in order to pass the Topics in Medicine 3 course and meet the criteria for graduation.

If a VIC exam (or exams) is/are not passed on June 14, students will be required to prepare for and pass a written remediation exam(s) for that VIC(s) on June 23, 2017.

If an exam or exams are not successfully remediated by June 23, 2017, a grade of “U” (unsatisfactory) will be given for the Topics in Medicine-3 course until successful remediation of the failed exam(s) by August 31, 2017.

If an exam or exams are not successfully remediated by August 31, this will result in a “Fail” for TCM-3. The student will have the “Fail” grade appear on their transcript until they successfully remediate and pass the failed VIC exam(s), at which time the grade on the transcript will become P*.

Failure to make timely arrangements to sit for the remediation exam(s) will result in a “Concern” for the Professionalism Competency.
