Atlases:

There are many gross human anatomy atlases in print. No particular atlas is required and students are free to choose one which best supports their learning approach. Given the importance of an atlas for use now and in your future practice a purchase is very strongly encouraged.

An atlas is an absolutely indispensable learning tool at the dissection table. Students may wish to keep a "clean" atlas at home for studying, and one for use in the dissection room. An atlas and the required dissector will be used heavily throughout the course.

A few excellent atlases in common use include:

Agur, AM. *Grant's Atlas of Anatomy* , 12th Ed., Lippincott Williams & Wilkins, 2009
