Clinical Introduction to Renal Disease
MHD I 2018-19

Theresa Kristopaitis, MD
October 22, 2018

Required Reading:
Robbins Basic Pathology, 10th edition
Pages 549-550

Recommended Reading:
Pathophysiology of Disease: An Introduction to Clinical Medicine, 7th edition
Gary D. Hammer, MD, PhD, Editor, Stephen J. McPhee, MD, Editor
Chapter 16, Renal Disease
available through LUHS library

Learning Objectives
• Define common terms used in discussion of renal disorders
• List characteristic signs and symptoms of renal dysfunction
• Define and describe common syndromes associated with renal disease
• List the renal syndromes referred to when evaluating a patient with a renal disorder
• See lecture “handout” for a list of questions that students should be able to answer unassisted by the end of the renal block
