Objectives

Vasculitis Lecture

Rochella Ostrowski, MD

1. Correlate the histopathologic findings of giant cell arteritis with the most characteristic symptoms and complications
2. Explain why Takayasu arteritis is also called pulseless disease
3. Correlate the histopathologic findings of polyarteritis nodosa with its most common symptoms
4. Compare and contrast the histopathologic findings of the three ANCA associated vasculitides
5. Define ANCA, p-ANCA, and c-ANCA
