Osteoarthritis & Chronic Inflammatory Arthritis

Date: Monday, February 25, 2019 – 9:30 am

Reading Assignment: Robbins Basic Pathology (Kumar, Abbas, Aster) 9th Ed. Chapter 20, pp. 782-790.

EDUCATIONAL GOALS AND OBJECTIVES

1. Distinguish primary from secondary osteoarthritis.

2. Briefly explain the pathogenesis of osteoarthritis.

3. Know the cardinal clinical and pathologic differences between inflammatory arthritis and degenerative arthritis.

4. Differentiate between the pathogenesis of rheumatoid arthritis, seronegative spondyloarthropathies, and osteoarthritis.

5. Describe the subsets of seronegative spondyloarthropathies.

6. Compare and contrast the clinical and pathology findings found in rheumatoid arthritis and seronegative spondyloarthropathies.
