Site/Rotation Description	The Neurology rotation is 2 weeks long. Students will be prepared to identify diseases and situations in which neurological evaluations is appropriate. Furthermore, the clerkship allows students to understand when neurological consultation is appropriate and when emergent neurological intervention is needed.  Objectives:  Become proficient with a basic neurological examination.  Learn and apply the principles of neurological localization to clinical diagnosis.  Know the major categories and cardinal manifestations of neurological diseases.  Be able to recognize common neurological emergencies.  Be familiar with major modes of neurological therapy.
Exposure to an Infectious or Environmental Hazard	All needle sticks and other exposures to blood or other potentially infectious body fluids should be immediately reported to the student's supervisor, clerkship administrator, and to the designated contact at the facility where the incident occurs, as well as the Neurology clerkship team at Stritch.  • Policies and procedures can be found on Zenworks through the "MNH Policy and Procedures" application icon.
Access to Health Care Services	If you have a health concern, please email the Neurology clerkship team at SSOM; please also update your MacNeal site clerkship director.
