

**Course Content:****Medical Knowledge/Patient Care:****1. CDC Guidelines for the Management of Chronic Nonmalignant Pain**

- a. Watch recorded lecture on Pain and Opioids
- b. Review Pain and Opioids PowerPoint slides
- c. Review \*recently updated\* CDC Guidelines for Opioid prescribing
- d. Complete quiz with passing score

**2. Opioid Use Disorder: Buprenorphine Mini-Course: Building on Federal Prescribing Guidance**

- a. Complete this 2-hour module on using buprenorphine to treat opioid use disorder
- b. Complete post-test and upload certificate to Sakai

**3. Laboratory Science**

- a. Watch the 4 lectures/modules
- b. Complete the 4 self-directed quizzes with passing score after each module

**Health Systems Science 4 Course:****1. HSS: Value Based Care**

- a. Read article on Value Based Care
- b. Watch a short 3-min video
- b. Attend and participate in one live facilitated Zoom discussion session on Value Based Care reading.

**2. HSS: Personal QI Project**

- a. Complete a longitudinal month-long project using QI principles to design a personal improvement project of your choice.
- b. Each week will require watching one IHI module, one project instruction video and complete a series of assignments that build on each other to culminate in a short video presentation of your project.
- c. Record (using Panopto) and upload your project presentation.
- d. Watch your assigned partners' project and provide feedback via a form you will upload.

**Personal/ Professional Growth:****1. Individualized Learning Plan (ILP)**

- a. Complete this ILP using a Google Form

b. Nationally, many programs are asking incoming interns to reflect on their preparedness to start residency and require a self-inventory. While your specific specialty will vary in the questions they ask, some of the information below can help you prep. We have an abridged version of this form designed to help you think about this transition.

**3. Optional: Financial Literacy for Residents (*optional*)**

a. This is an optional (but informative and helpful) 1-hour recorded talk from a financially savvy attending teaching basic and not-so-basic financial information for medical students. This material is useful as you transition to earning a paycheck and choosing benefits when you start as a resident. \*This is not the same information given in your Financial Aid exit interview. \*
